

Moving Parts Fairy

1. Before you get started you'll need to transfer the Fairy images to cardboard. You can just glue the paper onto card (use a gluestick) or trace the image on to card by holding it up against a window on a sunny day.
2. Colour-in the Fairy parts
3. Cut the pieces out and punch holes where marked, glue on crown if desired.
4. Attach the parts using split pins (brads)
